

1 (April 1, 2002)
2 Barrier delineators shall be placed on the traffic face of the barrier 150 millimeters
3 down from the top. Spacing shall be as shown in the plans. Delineator color shall
4 be white on the right of traffic and yellow on the left of traffic. The surface of the
5 barrier where the delineator is applied shall be free of dirt, curing compound,
6 moisture, paint, or any other material that would adversely affect the bond of the
7 adhesive. Install delineators with an adhesive recommended by the manufacturer.
